AIRLAB D30S DEHUMIDIFIER

Balanced Air. Better Living.

AIR FEELS DAMP?

- Musty smell.
- Sticky air.
- Clothes that never fully dry.

Even when your home looks clean, excess humidity can quietly affect how your space feels every day.

WHY YOUR HOME STILL FEELS UNCOMFORTABLE

Even with air conditioning, humidity doesn't disappear.

That's why:

- Your room still feels sticky
- Clothes take longer to dry
- Musty smells keep coming back

Because moisture is still trapped in the air.

WHAT HIGH HUMIDITY DOES OVER TIME

Excess humidity doesn't just feel uncomfortable — it affects your environment more than most people realise.

Over time, it can contribute to:

- Musty smells that keep returning
 - Damp, heavy air
- Slower drying of clothes and fabrics
 - Mould forming in hidden areas
 - Increased dust discomfort

For some individuals, it may also make indoor air feel heavier or less comfortable to breathe.

REMOVES UP TO

25L

OF MOISTURE
PER DAY

AIR CONDITIONING COOLS THE AIR

AirLab D30S removes the moisture.

A BETTER WAY TO CONTROL YOUR ENVIRONMENT

The Velta AirLab D30S removes up to 25 litres of moisture per day, helping restore balance to your indoor air.

Your Space Feels:

- Drier
- Lighter
- More Comfortable
- Automatically.

DESIGNED FOR REAL LIVING SPACES

Perfect for:

- Bedrooms
- Living rooms
- Laundry drying
- Medium to large spaces

Powerful enough for daily use. Simple enough for anyone.

DID YOU KNOW?

Humidity is often the hidden factor affecting your comfort.

Even when air looks clean, excess moisture can lead to ongoing discomfort, odours, and long-term impact on your living environment.

Managing humidity changes how your home feels – every day.

Because Your Body Knows the Difference.
