AIRLAB P80S AIR PURIFIER

Engineered for the air you don't see.

velta.my

THE PROBLEM

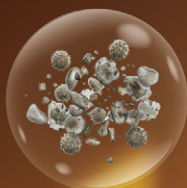

Most things that affect air quality at home are invisible.

Fine particles. Airborne irritants.

Odours that linger longer than they should.

They build up quietly — in the rooms you sleep in,
the spaces you spend most of your time.

You don't see them. But they're there.

THE INSIGHT

Even in a clean home, air doesn't always feel right.

Dust returns too quickly.

Rooms feel enclosed.

Something lingers after cooking.

Because air quality isn't about surfaces — it's about what stays
suspended in what you breathe.

Most of us don't think about it. Until we do.

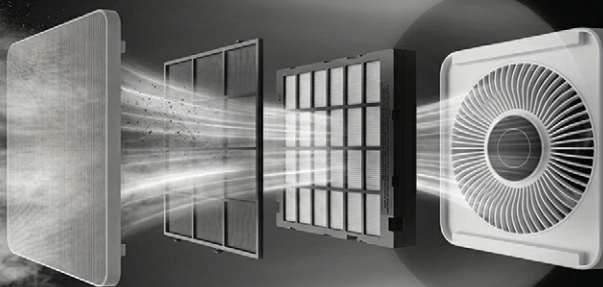

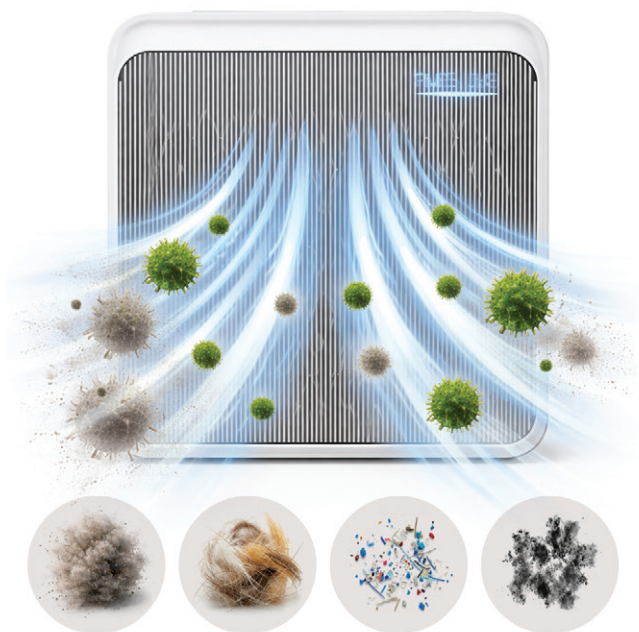

VERIFIED PERFORMANCE

Air quality should be something you can trust. Not guess.

Purification performance and filtration efficiency independently tested and verified by SGS – one of the world's most recognised testing and certification organisations.

WHAT IT REMOVES

Captures what you can see — and what stays suspended in your air.

Dust • Pollen • Pet Dander • Smoke
PM2.5 • Allergens • Odours
Mould Spores • Airborne Contaminants

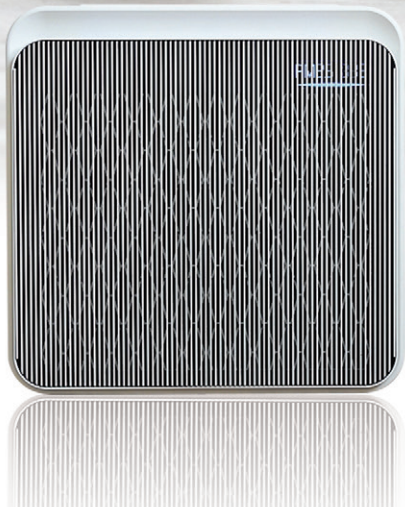

Tested to capture particles down to $0.01\text{ }\mu\text{m}$.
Purification performance verified through independent SGS testing.
*Tested under controlled laboratory conditions. Performance may vary based on environment and usage.

HOW IT WORKS

PRE-FILTER

Captures up to 98.1% of floating hair and larger airborne particles — dust, pollen, pet dander, mould spores.*

Virus • Bacteria • Pollen • Dust Mite Dander

CORECHARGE™ ELECTROSTATIC FILTER

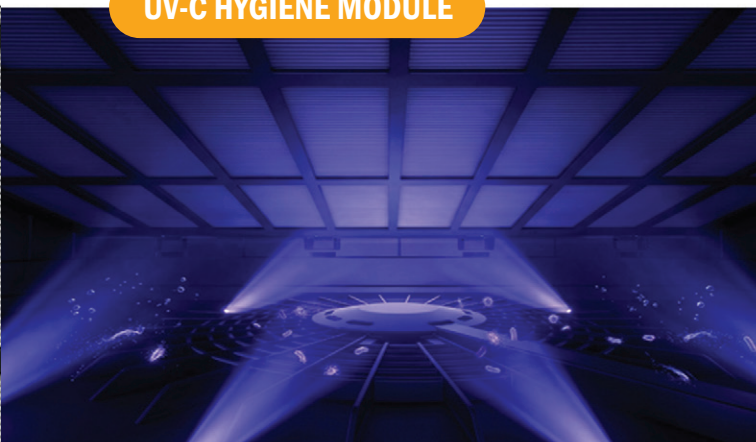

Captures microscopic particles down to $0.01\text{ }\mu\text{m}$ — including PM2.5, smoke, allergens, and formaldehyde.*

Smoke Odour • Odour • Formaldehyde • PM2.5

Washable. Reusable. No replacement cost.

UV-C HYGIENE MODULE

Operates within the unit's internal airflow system. Helps reduce microbial build-up on internal components over time.

Bacteria • Microbial Contaminants

*Tested under controlled laboratory conditions.

PRODUCT SPECIFICATIONS

Brand	Velta
Model	P80S
Voltage/Frequency	230~240V / 50Hz
Power	12-55W
Smoke CADR	441 m ³ /h
Purification & Filtration	SGS Verified
Coverage	Up to 62 m ²
Filtration	Pre-filter + CoreCharge™ Filter (Both washable)
UV Module	Internal UV-C hygiene module, sealed
Sensors	PM2.5 + VOC, real-time
Modes	Auto / Manual / Sleep / Timer
Fan Speeds	6 levels – Speed 1 to Speed 5, plus Turbo
Connectivity	Wi-Fi 2.4GHz
App	Velta – App Store & Google Play
Dimensions	480 × 480 × 180 mm
Operating Temperature	0°C – 40°C

THE EXPERIENCE

You don't see the difference. You feel it.

Cleaner air at night. Less lingering odours.

A space that feels lighter to be in.

Not dramatic changes. Consistent ones.

The kind that accumulate into a home that simply feels
better to live in.

Air, corrected.

Because Your Body Knows the Difference.
