Hhuhu

THE FUTURE OF DRINKING HYDROGEN LOOKS LIKE THIS

Hydrogen Milker™ transforms ordinary water into something extraordinary. Infused with billions of micro and nano hydrogen bubbles so dense, the water turns visibly milky — delivering ultra-absorbable H_2 for deep cellular support and powerful antioxidant protection.

Hydrogen you can see. Results you can feel. Only by Velta.

Lab-verified concentration. Patented dispersion technology.

> **Oxidative stress is linked to 90% of modern diseases.**
>
> **Nature Reviews Drug Discovery**

WHY HYDROGEN, AND WHY NOW?

Free radicals are unstable molecules that build up silently in your body—from pollution, processed food, stress, lack of sleep, and even your own metabolism. This leads to oxidative stress, which weakens cells, accelerates ageing, and contributes to disease.

Your body already produces antioxidants to protect itself. But in modern life, it's simply not enough.

This is where molecular hydrogen (H_2) stands out. As the smallest and most selective antioxidant, it can reach deep into your cells—especially your mitochondria—to neutralize only the most harmful free radicals.

Introducing Hhuhu Hydrogen Milker™ — Now in Malaysia, Exclusively by Velta

Powered by advanced micro-nano bubble technology, this next-generation hydrogen water system delivers high-performance hydration for deeper absorption, antioxidant defense, and cellular renewal.

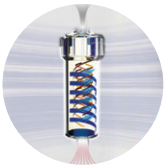
WHAT MAKES HHUHU HYDROGEN MILKER™ DIFFERENT?

Hydrogen water machines are not all created equal. Here's what sets Hydrogen Milker apart:

Feature	Hhuhu Hydrogen Milker™
Hydrogen Delivery Method	Dissolved hydrogen + suspended micro/nano hydrogen bubbles
Hydrogen Concentration	Exceeds 10,000 ppm (combined dissolved + bubble form)
Nano-Bubble Size	≈163 nm (lab-verified); 200× smaller than red blood cells
24-Hour Retention	9.5–10.2 billion nano-bubbles per ml; continues working long after drinking
Visible Proof	Hydrogen Milk™ cloud — a natural visual cue of active hydrogen in peak state
Absorption Efficiency	Dual-phase absorption: rapid uptake + sustained release
Hydrogen Content in 100 ml	2.85cc ~ 4.28cc
Maintenance	Filter-free design — no replacement parts required
Certifications	Tested by SGS to meet drinking water standards; TÜV-certified and compliant with CE, FCC, RoHS and NSF 61
Tank Quality	BPA-free 3L tank — large, safe and practical for family use
Manufacturing Standard	Medical-grade production facility

Exclusive Patented Technology

Hydrogen gas is seamlessly blended with pure water to create ultra-stable, high-quality hydrogen water — every time.



Detachable Water Tank

Crafted from food-grade PC material, the 3000cc tank features a wide- mouth opening for easy refills. Its smooth, corner-free interior prevents dirt and scale buildup—making cleaning quick and effortless.

Our **Hydrogen Milk™** delivers an ultra-rich concentration of up to 10,000 ppm—far higher than typical machines. Just 100 ml can carry approximately 110–120 billion micro-nano hydrogen bubbles, offering both visible proof and powerful antioxidant support.

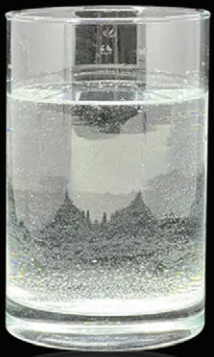
WHAT IS THAT SWIRLING CLOUD?

We call it Hydrogen Milk™ — and it's completely natural. When hydrogen is released at ultra-high concentration and nano-scale, it forms a beautiful, milky-white cloud that naturally swirls in the water.
This isn't caused by additives or powders — it's the real-time motion of microbubbles encapsulating hydrogen gas.

"You don't need lab equipment to see it working — the swirling Hydrogen Milk™ cloud is visible proof of active nano-bubbles, scientifically verified and widely used in wellness centers across Asia."

Best time to drink? The moment it turns milky — that's when hydrogen activity is at its peak.

(Left) Billions of Bubbles — A Visible Burst of Hydrogen Energy The milky cloud you see is created by densely packed micro- and nano-sized hydrogen bubbles — clear evidence of fresh hydrogen infusion.



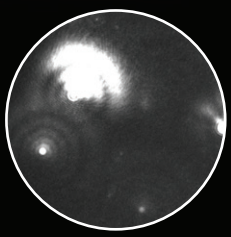
(Right) Long-Lasting Nano-Bubbles As larger micro-bubbles dissolve, nano-hydrogen bubbles stay suspended—remaining active and effective for longer-lasting benefits.

VISUAL PROOF IN ACTION

Watch how Hydrogen Milk™ forms right before your eyes:

See the swirling cloud in real time — your first glass of visible hydrogen.

Verified Under the Microscope:



Captured using Nanoparticle Tracking Analysis (NTA). Each bubble averages just 163 nm — invisible to the naked eye, but powerful inside your body.

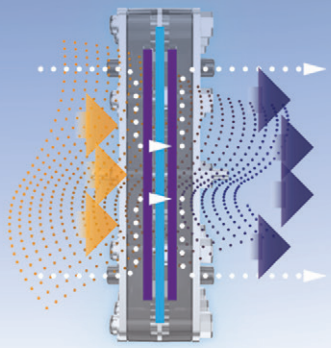
Certified by:
SGS • TÜV • CE • FCC • RoHS • NSF 61
Backed by Swiss & Japanese components

BUILT LIKE A MEDICAL DEVICE

Hydrogen Milker is produced in a **certified clean-room facility**, using the same standards applied in food-grade and medical equipment manufacturing.

- **ISO-certified production**
- **FUJIFILM SPE membrane for safe hydrogen generation**
- **Strict QC and material safety**
- **Tested by SGS and TÜV for safety and water standards. Certified with CE, FCC, RoHS, and NSF 61 compliance.**

This isn't made in a typical appliance factory. It's engineered for people who care what goes into their bodies.



The Technology That Powers It All Solid Polymer Electrolyte (SPE) System

Our hydrogen system is built on SPE technology — the gold standard for clean and efficient hydrogen production.

- Produces high-purity hydrogen
- Provides stable and consistent gas flow
- Operates cleanly, with no harmful by products
- Long-lasting design with reliable performance

A trusted solution for therapeutic-grade hydrogen delivery.

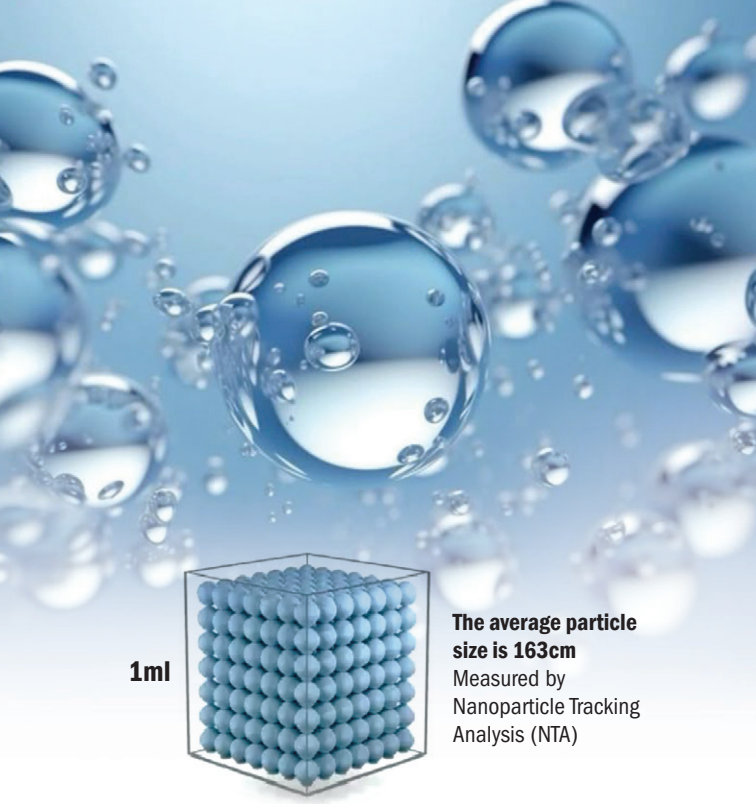
We use FUJIFILM Solid Polymer Electrolyte (SPE) Membranes to ensure high-purity hydrogen and consistent performance.

EVERYDAY FREE RADICAL TRIGGERS IN MALAYSIA

Even with a healthy lifestyle, free radical exposure is unavoidable in modern Malaysian life:

Diet & Food	Environment	Lifestyle & Hidden Risks
Fried/processed food	Haze & pollution	Poor sleep & overwork
Alcohol & sweetened drinks	UV exposure	Smoking & heavy screen time
Processed meats	Chlorine in tap water	Household cleaning chemicals
Frequent takeaways & dining out	Microplastics in water	Aerosol sprays, artificial fragrances
Pesticide residues	Long-term exposure to toxins	Chronic stress, long-term medications

These triggers drive free radical buildup and cellular damage — even in healthy individuals. Over time, this leads to inflammation, faster ageing, weakened immunity, and chronic disease.

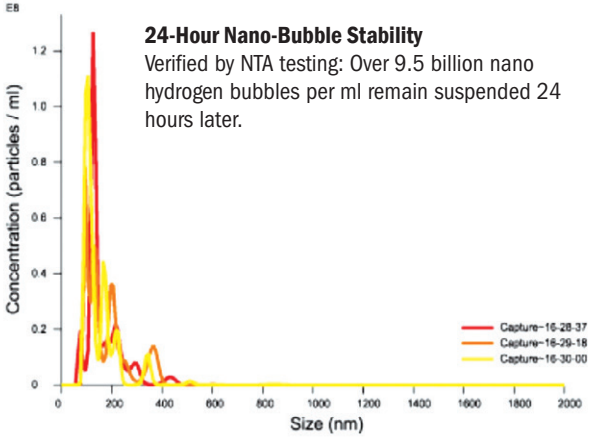


1ml

The average particle size is 163cm
Measured by Nanoparticle Tracking Analysis (NTA)

IT'S NOT JUST WATER. IT'S HYDROGEN YOU CAN DRINK

EACH ML contains over 12 billion nano- and micro-bubbles, designed to carry hydrogen through your mouth, throat, and gut for better absorption.



24-Hour Nano-Bubble Stability
Verified by NTA testing: Over 9.5 billion nano hydrogen bubbles per ml remain suspended 24 hours later.

WHO BENEFITS MOST FROM HHUHU HYDROGEN MILKER™

This isn't just another wellness gadget - it's essential cellular protection for modern Malaysian lifestyles:

For Families
- Caring for your child's daily health and development
- Supports parents' energy and immunity

For Health-Conscious Individuals
- Those pursuing longevity and graceful aging
- Skin wellness enthusiasts seeking radiance from within

For Busy Professionals
- Combats fatigue from urban pollution and stress
- Enhances recovery after long workdays

For Wellness-Focused Individuals
- Those who value science-backed prevention
- Anyone seeking better hydration with added benefits

"It's not just water - it's intelligent protection in every sip."

TRUSTED BY OVER 10,000 USERS ACROSS ASIA

The Hhuhu hydrogen health series has earned the trust of families, wellness centres, and clinics in Taiwan and Japan — backed by over 500 real user testimonial videos.

Now, it's finally available in Malaysia, so you can experience the difference firsthand.

PRODUCT SPECIFICATIONS

Specification	Details
Product Name	Hhuhu Hydrogen Milker
Country of Origin	Made in Taiwan
Suitable Water Quality	Distilled Water / RO (TDS < 10)
Suitable Water Temperature	Room Temperature Only
Power Supply	100V – 240V (Universal Voltage)
Power Consumption	< 200W
Product Weight	< 9 kg
Water Tank Capacity	3000 ml
Product Dimensions	223mm(W)×326mm(H)×476mm(D)
