HYDROFIRST+

Your First Choice — Anytime, Anywhere.

VELTA HYDROFIRST+

Your First Choice — Anytime, Anywhere.

Your everyday water, perfected. From **morning baby bottles** to **chilled water after a workout** or **late-night herbal tea**, it's ready in seconds — always pure, always at the right temperature. It delivers **pure water** at **precise temperatures and volumes** without plumbing or hassle. Just plug, fill, and enjoy.

PURE WATER, PRECISELY SERVED

Live TDS display shows purity in real time for instant peace of mind.

SIX TEMPERATURE PRESETS

10°C

25°C

40°C

60°C

80°C

95°C

From chilled refreshment to near-boiling for cooking and sterilising.

FOUR ONE-TAP VOLUMES

100 ml

250 ml

330 ml

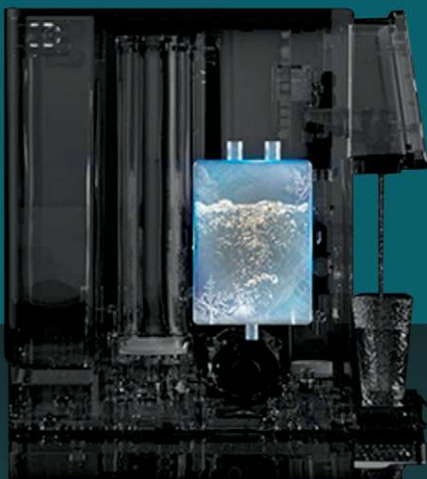

500 ml

Perfect for cups, bottles, flasks, or quick cooking prep.

INSTANT HOT WATER

High-efficiency dual modular heating reaches
95°C in 30 seconds

ELECTRIC COOLING

Energy-smart semiconductor system chills to
10°C
switch off cooling when not needed
to save power.

20
GLASSES

**BIG CAPACITY,
REAL-WORLD CONVENIENCE**
5L Source Tank (≈ 20 Glasses)

Supports daily family use.

Detachable 1.6 L pitcher auto-refills the tank and lets you **serve at the table, pour into pots for soup/rice or chill water in the fridge** – without moving the machine.

Safety, Upkeep and Everyday Ease

Child-lock on hot water for family safety.

BPA-free water pathway materials.

Rinse function keeps the RO membrane clean and hygienic.

Low-noise, energy-smart operation for bedrooms and workspaces.

High Purification Speed

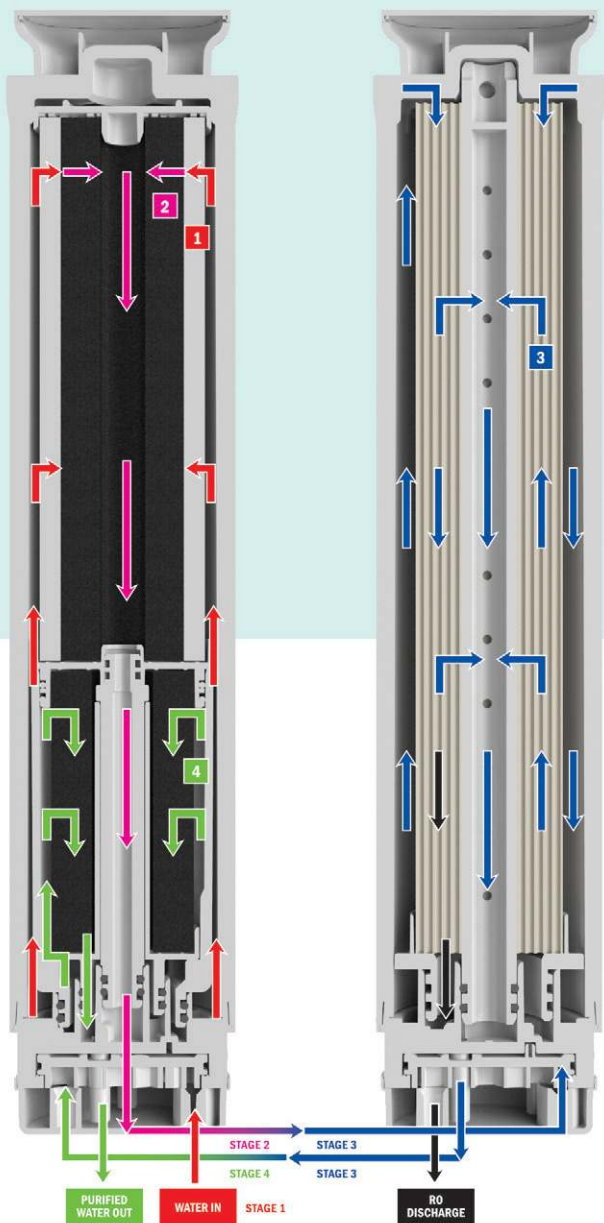

Upgraded **100 GPD RO membrane** delivers purified water **20% faster** than standard 80 GPD systems – less waiting, more enjoying.

**Based on internal tests vs. 80 GPD RO membranes.*

WHAT IT REMOVES

- ▶ Rust
- ▶ Chlorine
- ▶ PFOS/PFOA
- ▶ Pesticides
- ▶ Antibiotics
- ▶ Heavy Metals
- ▶ VOCs
- ▶ Microplastics
- ▶ Bacteria
- ▶ Viruses
- ▶ Odours

4-STAGE VELTA NANOPURE™ REVERSE OSMOSIS FILTRATION SYSTEM

Every drop you drink passes through a precise, multi-stage purification journey – removing impurities down to 0.0001 micron while delivering a fresh, crisp taste.

STAGE 1 PRE-FILTER

The first line of defence. Removes larger particles such as **sediment, rust and suspended solids** from the source water, protecting the next filters and prolonging their lifespan.

STAGE 2 ADVANCED CARBON BLOCK

A high-performance carbon block with **micro-porous structure and large surface area** that:

- Adsorbs **chlorine, volatile organic compounds (VOCs)** and chemical residues
- Reduces **heavy metals** via catalytic reduction
- Improves taste and odour for a cleaner, fresher drink

STAGE 3 RO MEMBRANE

The heart of the system. A **0.0001 µm precision semi-permeable membrane** that filters away:

- **Heavy metals (lead, mercury, arsenic, cadmium)**
- **Organic chemicals & pesticides**
- **Antibiotics and pharmaceutical residues**
- **Bacteria, viruses and microplastics**
- Dissolved salts and contaminants invisible to the naked eye

STAGE 4 POST CARBON BLOCK

A final polishing stage to ensure your water tastes crisp and pure by:

- Removing any **trace chlorine, chemicals or odours** that may remain
- Delivering water that's **fresh, smooth and pleasant** to drink straight from the dispenser

PLACE IT ANYWHERE

Enjoy plug-and-fill freedom with no plumbing needed.

Perfect For:

Kitchens

Dining Areas

Living Rooms

Bedrooms

Baby Rooms

Home Offices

Pantries

Gym Corners

Guest Rooms

Dorms

Vacation Homes

Rentals

Colour Options

Graphite Grey — Sleek, modern and bold

Lunar White — Pure, clean and timeless

EFFORTLESS SELF-SERVICE CARE

Swap filters in seconds with our precision twist-lock design—no tools, no service calls. A smart reminder keeps your water at its best.

HYDROGEN-READY WELLNESS

The pure, **ultra-low TDS** output is the ideal base water for hydrogen devices — pair it with the **Velta × Hhuhu Hydrogen Milker** to create hydrogen-rich water for your daily wellness ritual.

Optional add-on:
Velta Hhuhu Hydrogen Milker
— Unlock full hydrogen wellness.

Disclaimer: Ultra-low TDS levels depend on source water quality and may influence performance and compatibility with the Velta Hhuhu Hydrogen Milker.

PRODUCT SPECIFICATIONS

Specification	Details
Product Name	Velta HydroFirst+ Instant Hot/Cold Water Dispenser
Dimensions	233 × 424 × 414 mm
Net Weight	10.0 kg
Voltage / Frequency	230V / 50 Hz
Power Usage	Total 2,270W – Heating 2,160W
Water Resistance	IPX4 – Splash Protection
Operating Temp Range	5°C – 38°C
Source Water Tank	5 L – Large Capacity
Cold Water Tank	0.37 L – Chilled Instantly
Purified Water Pitcher	1.6 L – Ideal for Serving or Cooking
Purified Water Flow Rate	15.6 L/hour
Filtration Accuracy	0.0001 µm – Removes Viruses & Heavy Metals
Filter Life & Capacity	Up to 3,600 L or 12 months*
Colour Options	Graphite Grey Lunar White

NANOPURE™ 4-STAGE FILTRATION

Pre Filter	Removes sediment, sand, large particles
Advanced Carbon Block	Targets chlorine, odour, VOCs
RO Membrane	Eliminates heavy metals, dissolved solids, bacteria, viruses, pesticides, antibiotics
Post Carbon Block	Final polish for a clean, refreshing taste

***Note:** Replace filters every 3,600 L or 12 months, whichever comes first.
