HYDROFORM+

CLEAN DESIGN. CLEAR DIFFERENCE.

Hybrid • Instant • Intelligent

THE WAY WE THINK ABOUT WATER IS CHANGING

We expect more — purity, speed and design that fits the rhythm of modern life. HydroForm+ is built for that world, where clean water isn't a luxury — it's the baseline.

Effortless, reliable and intelligently designed — because better water means a better life for you and the ones you love.

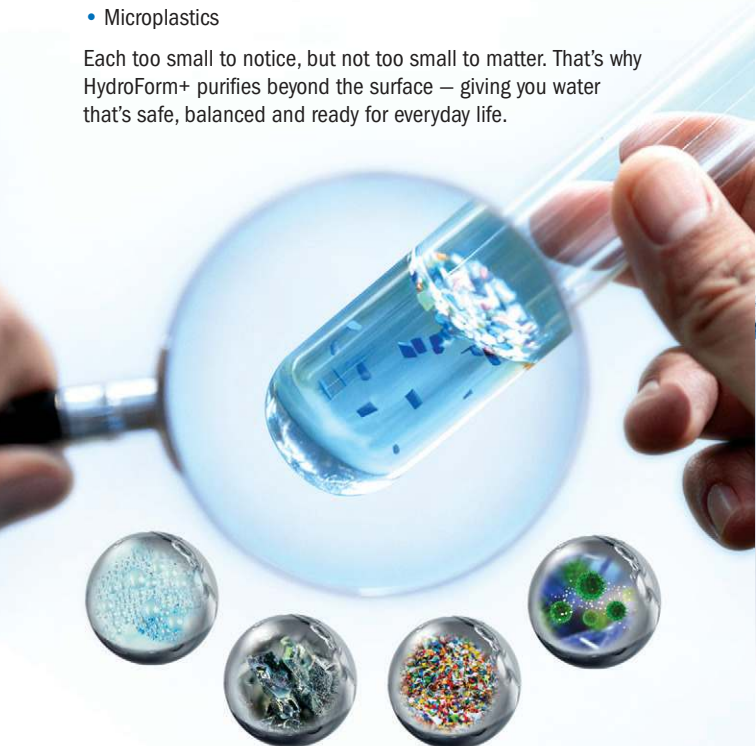

WHAT'S REALLY IN TAP WATER

Clear water can still hide what you don't see. Everyday tap water may contain:

- Chlorine and heavy metals
- Pesticides and PFAS (forever chemicals)
- Medication traces and VOCs
- Microplastics

Each too small to notice, but not too small to matter. That's why HydroForm+ purifies beyond the surface — giving you water that's safe, balanced and ready for everyday life.

THE SCIENCE OF CLEAN WATER

HydroForm+ purifies through its NanoPure™ 5-Stage Filtration System, combining two advanced composite filters and UV protection for complete peace of mind.

STAGE 1

Sediment Filtration (PAC Composite Filter)

Removes rust, dust and suspended particles — the first line of defence for lasting purity.

STAGE 2

Activated Carbon Filtration (PAC Composite Filter)

Reduces chlorine, VOCs, odours, and chemical residues, improving taste and clarity.

Stage 3

Reverse Osmosis Filtration (RO & ACF Composite Filter)

Removes dissolved solids, heavy metals, microbes and pesticides through a 0.0001 µm RO membrane — targeting contaminants thousands of times smaller than a human hair.

STAGE 4

Post-Carbon Polishing (RO & ACF Composite Filter)

Balances taste and eliminates residual chemicals, ensuring every sip is clean and smooth.

Stage 5

UV Sterilisation (Water Outlet)

Neutralises bacteria and microbes that may form in water lines, preventing secondary contamination at the final outlet.

Built with BPA-free and silicone-free materials, HydroForm+ ensures only the cleanest components ever touch your water. Smart sensors track filter life and alert you when replacement is due — with a self-twist, one-step filter system for quick, mess-free maintenance.

PRECISION AT EVERY DEGREE

Every drink, every pour — exactly how you want it.

Whether it's 99°C for cooking, 85°C for brewing, or 45°C for baby milk, HydroForm+ delivers perfectly heated water in seconds.

The full-touch display lets you fine-tune temperature in 1°C increments for total precision.

Inside, a SUS444 stainless-steel thick-film heating coil brings water from ambient to boiling in seconds — efficient, fast, and free from reboiling or heat loss.

Nickel-free and refined for purity and long-term heat stability, SUS444 is trusted by Japanese engineers for its precision and reliability — keeping every drop clean and every pour consistent.

INTELLIGENCE YOU CAN SEE

HydroForm+ brings clarity to every interaction.

Live TDS Display

See your water's purity in real time

UV Outlet Protection

Prevents secondary contamination at dispense

Auto Rinse System

Cleans itself after every filter change or when activated manually

Filter Life Monitoring (%)

Always know when it's time for renewal

Child Lock & Eco Mode

Safety and energy efficiency built in

A clean interface and subtle feedback make every use feel natural — technology that works with you, not against you.

DESIGN THAT FITS YOUR SPACE

Compact. Tankless. Effortlessly modern.

HydroForm+ blends form and function, fitting beautifully into any home — from compact apartments to open kitchens.

Every curve, finish, and light cue reflects calm precision and timeless simplicity.

Available in:

Carbon Black • Stellar White

Space-saving by design, HydroForm+ frees your countertop without limits — the elegance of less, done better.

BUILT FOR EVERYDAY LIFE

Hybrid Instant-Flow RO System

Fresh direct-flow water supported by small precision chambers for stable temperature.

Instant Dispense

No waiting, no refills

Large Full-Touch Display

Intuitive and responsive

Quick Maintenance

Filters replace in seconds

BPA & Silicone-Free Materials

Clean contact throughout

Designed to perform flawlessly day after day – reliability that feels effortless.

THOUGHTFUL BY NATURE

HydroForm+ was designed with intention – to make better choices effortless.

- Every pour replaces a plastic bottle
- Every standby cycle conserves energy
- Every component is built to last longer and waste less

Good design doesn't just look right – it feels right.

PRODUCT SPECIFICATIONS

Feature	Details
Power Supply	220-230V 50/60Hz
Heating Power	2100 W
Cooling Power	125 W
UVC LED Sterilisation	2.5 W
Water Production Flow Rate	0.52 L/min
Temperature Range	5-100°C
Cold Water Output	1.5 L/hour
Hot Water Output	Unlimited
Filter System	Dual Composite (PAC + RO & ACF)
Filter Lifespan	PAC: 2100 L • RO & ACF: 3000 L
Operating Pressure	0.1 – 0.4 MPa
Material	BPA-Free ABS + Metal
Dimensions (D×W×H)	425 × 180 × 380 mm
Net Weight	7.3 kg

Because Your Body Knows the Difference.
