HYDROVIEW+

Purity You Can See. Confidence You Can Trust

WHY SMART HOMES CHOOSE VELTA

Not all filters are created equal. Here's why health-conscious trust Velta:

Advanced Reverse Osmosis (RO)

Removes 99.9% of contaminants—microplastics, metals, bacteria, viruses, pharmaceuticals, PFAS, and chlorine residues.

Globally Trusted Technology

Proven membrane technology used worldwide for medical and food-grade purification.

Hydrogen-Compatible Water

Ultra-low TDS water optimized for hydrogen systems (e.g., Velta Hydrogen Milker).

Smart & User-Friendly

Real-time TDS display, auto-flush function, replacement, dual-outlet smart faucet.

DUAL-OUTLET SMART FAUCET

One faucet, multiple benefits:

Clear LED
filter-status alerts

Right Lever

Dispenses pure water for
direct drinking

Left Lever

Dispenses clean water for
rinsing fruits and vegetables

MICROPLASTICS: A HIDDEN DAILY THREAT

Microplastics and nanoplastics carry toxins, hormone disruptors, and heavy metals, which can enter your bloodstream and potentially lead to inflammation, hormonal imbalance, and long-term health issues.

If your filter can't remove them, your body could absorb them daily.

Velta NanoPure™ RO filters down to 0.0001μm, effectively blocking even microscopic contaminants—keeping these hidden threats out of your drinking water.

Certified filtration process with NSF-compliant components.

THE TRUTH ABOUT ALKALINE WATER & MINERALS

Many filters emphasize alkaline water or minerals, but:

- Your body maintains a strict internal pH regardless of drinking water pH.
- Minerals in water are typically inorganic, poorly absorbed and negligible.
- Fact: One serving of vegetables provides far more minerals than days of mineralized water.

Experts agree: Water purity matters most.

WHY PURE WATER MATTERS

Even tiny daily pollutants gradually affect your health. Pure water helps you:

Reduce strain on your detox organs (liver, kidneys)

Boost hydration, energy and cellular health

Limit fatigue and inflammation caused by contaminants

Maximize effectiveness of advanced wellness devices like hydrogen systems

OPTIMIZED FOR HYDROGEN WELLNESS

Velta HydroView+ produces ultra-low TDS water, specifically engineered for hydrogen wellness devices:

- Ensures consistent hydrogen infusion
- Prevents impurities from harming your machine
- Maximizes antioxidant benefits of hydrogen
- Real-time TDS ensures constant purity

Not all water is hydrogen-compatible—Velta makes sure yours is.

Optional add-on:

Velta Hhuhu Hydrogen Milker
— Unlock full hydrogen wellness.

PRODUCT SPECIFICATIONS

Specification	Details
Product Name	Velta HydroView+ Water Purifier
Water Produced	• Reverse Osmosis Water • Composite Filtered Water
Product Dimensions	381 × 165 × 435 mm
Product Weight	7.8 kg
Voltage	110V / 220V
Source Water Pressure	1 – 4 Bar
Proper Water Temperature Range	5 – 45°C
Source Water Connection	Cold Waterline
Flow Rate	2.1 L/min
Filtration Accuracy	0.0001 µm
Purified Water Flow	800 G
Pressure Tank	None
Power Usage	90 Watts
Certifications	IHSA Certified

ADVANCED FEATURES YOU'LL ACTUALLY USE

NanoPure™ 5-Stage RO

Filters down to 0.0001µm

High Flow (2.1L/min)

Instant pure water supply

Real-Time TDS Display

Instant quality feedback

Easy Twist Filter Replacement

Quick and tool-free

Auto Flush & Safety Cut-off

Protects membrane lifespan

Slim, Elegant Design

Saves under-sink space

Smart Digital Faucet

Clear visual reassurance

Bluetooth Diagnostics (Tech Only)

Easy technical support

CLEAN WATER. NO COMPROMISE.

Velta doesn't just filter water—
it removes what your body was never meant to handle.

Eliminate
harmful substances
(microplastics,
toxins, heavy
metals)

Preserve
essential health
and
hydration

Protect your
family's future—
One clean,
powerful glass
at a time

Drink smart. Live well. Choose Velta.
